*Weight restrictions may apply to offshore locations.

Volumetric Weight

From time to time it's necessary to calculate the volumetric weight of a package/parcel as the cost can be affected by the amount of space the parcel/package occupies when being transported.

Use the formula

$$\frac{\text{Height (cm)} \times \text{Length (cm)} \times \text{Breadth (cm)}}{6000} = \text{Volumetric Weight}$$
